[Intersolar India 2011](#) was well received by visitors and exhibitors alike as it strengthened its position as India's largest solar technology exhibition in 2011. The figures of the event summarize the great success of Intersolar India 2011 edition: 264 exhibitors from 18 countries attended the exhibition that took place at the Bombay Exhibition Centre in Mumbai. Comparing with the exhibitors of 2010 edition, this year has been an impressive 84% growth in the number of exhibiting companies; this is a very significant success of this edition. 9314 visitors attended the event coming from 38 countries; this figure represents a 62% growth compared to 2010 edition. The Intersolar India Conference that took place jointly with the exhibition was also successful with more than 100 speakers who exchanged the latest technological news of solar market with the crowd audience.

The successful experience of [Gorosabel Solar Energy](#) in this event encourages us to repeat the attendance for 2012 edition. Thank you very much to all visitors.
